Projects Overview

New Rentoor-An Online Real Estate Agents

Technology: ReactJS, Node JS, MongoDB, Express JS, JavaScript(ES6), Firebase, HTML, CSS, Material UI, Context API

- This is a real-estate agent's online website.
- Authenticated users can buy apartments.
- Before the complete order, customers will have to submit the delivery address, and they can see order details from their individual dashboard.
- In the admin panel, admin will be able to maintain customer's order record, products collection and a lot of functionalities.

TravelX-An Online Tourism Website

Technology: ReactJS, JavaScript(ES6), Firebase, HTML, CSS, Tailwind CSS, Firebase, Context API

- The site's users are mostly travellers who want to travel through-out the world themselves. So, we tried to make a very user friendly ui.
- Most of the time traveller can't decide where to go with their budget. So we focused in showcasing low budget cost packages in the front page
- We have Google Authentication to make their life easier so that they don't have to feel hustle while using log in

Backend

Node, Express, MongoDB, Rest API, Firebase

Familiar With

Typescript, Material UI, Next JS, React Native, React Testing Library, SASS, Vue JS, Laravel, PHP, SQL.

Tools

Git, Vs-Code, Netlify, Heroku, Figma, Draw.io, Chrome Dev Tool, Photoshop, Illustrator, Canva, Trello

Additional Skills

Programming Language

- C Programming
- Java Programming
- Know SQL Database
- Data Structure with C++
- Machine learning with Python

Languages

English-Fluent
Bangla- Native
Hindi- Communicative

Training

Web Development

July-21 to November -21

An intensive 6 months online front-end web development training conducted by Jhankar Mahub.

Education

BSC in Computer Science and Engineering

North South University

- CGPA 3.30 out of 4.00 (Current Average)
